Vidyalankar Institute of Technology
Semester V – INFT- Mid Semester Assessment – 1

Date: 02/09/2024	Computer Network Security	20 Marks/ 45 Min.

1	**Solve any two (5 marks each)**		**CO**
	A	Draw neatly the classification tree of cryptography methods	CO1
	B	Using Symmetric encryption algorithm, identify the cipher text to securely send the data between two users. **Assume the Plain text to be "Mangoes are sweet and costly" using the key as (11, 9).**	CO1
	C	Using Extended Euclidean distance identify the multiplicative inverse of 17	CO1
2	**Solve any one (10 marks each)**		
	A	Consider the Plain text as "**SECURITY IS AN IMPORTANT ASPECT IN COMMUNICATION"**, identify the ciphertext using key as "**CRYPTOGRAPHY"** use PLAYFAIR CIPHER METHOD	CO1
	B	Explain what Phishing attacks is? Explain tool used to perform phishing attack.	CO3

CO1	Explain the fundamentals concepts of computer security and network security
CO3	Study and describe the system security malicious software
